

DATA SHEET

Ref. 2188-GIX6

Mod. 'X6' . Dual lens panoramic clear anti-fogging glasses for mechanical hazards.

Characteristics: Dual lens with panoramic PVC structure and polycarbonate anti-fog eye for mechanical hazards (projections, liquid drops -3-, thick dust -4- and molten metal and hot solid splashes -9-).

Impact of particles at high speed and extreme temperatures of medium energy (BT).

Indirect ventilation by micro-grooves to reduce condensation.

Compatible with most prescription glasses.

Excellent optical quality (Class 1).

Uses and functions: in all kinds of activities with risk of projections (metal, wood, stone), liquid (chemical industry, spray painting...), thick dust (pollen...) and molten metal splashes (chemical industry, smelting, furnaces...).

CE EN166 Ocular eye protection. General requirements.
